CWS is now offering a Secure Magtoner Laser Check print as an option to the Payroll and Accounts Payables Modules. Developed with security and ease of use in mind, the new Magtoner Laser Check print provides the features modern financial departments demand today.

**NEW!**

Secure name font provides for the Payees name to be printed twice, the second time in a larger font making it extremely difficult to alter the payees name without destroying the check.

**SECURE MAGNETIC TONER LASER CHECKS**

With Logo-Watermark and Signatures

If you move to a new address or even change banks, MICR check information can be changed without wasting checks or ordering new stocks.

**CHANGE MADE EASY**

Secure name font provides for the Payees name to be printed twice, the second time in a larger font making it extremely difficult to alter the payees name without destroying the check.

**SECURE NAME FONT**

**CHECK PRINT FEATURES**

- Entire Check Printed on special stock
- Bank Information
- Issuer Name and Address
- Issuer Logo-Watermark

**CHECK PRINT SECURITY FEATURES**

- Check Access protected by multiple levels of password security that requires user and administrator access rights
- The optional Signature Printing feature allows up to three signatures per check, with dollar limit controls associated with each signature

**MICR AND CUSTOM SCRIPT FONTS**

MICR (Magnetic Ink Character Recognition) font (shown above) is the industry standard used by Banks and Check Suppliers nationwide. The amount script (shown below) Illustrates the ability to use any available system font on printed checks. This is an additional security feature customizable by the user.
